

The Watling Gardens Beds - First summer

In the Spring of 2013, four new flower/plant beds were planted at the front of Watling Gardens. The aim was to create a mass of colour and fill the beds with lots of flowers to attract butterflies. Look on the website for the plant details, or better still - walk around the beds and read the labels! Which is your favourite colour?

At the back of bed 4, there are lots of herbs planted - don't forget to get and get a cutting...fresh thyme, rosemary, delicious in all kinds of meals.
